**WHICH TOOL IS BEST FOR YOU?**

# MaxiPro™

## DIAGNOSTIC & ANALYSIS SYSTEMS

The premier Autel line of MaxiPro Automotive Diagnostic Analysis System Tools are perfect for technicians who want affordably priced tools that are easy to use. These tools offer extensive dealer level diagnostic capabilities for all 1996 and newer vehicles. Whether you are testing Domestic, European or Asian vehicles, they deliver everything you would expect and more with complete functional capability on body, chassis, powertrain and on board communication modules. The MaxiDAS DS708 offers functions found in much higher priced manufacturer's tools like sensor initializations, ECU replacement, module setups, immobilizer configuration, key coding, component activation testing and much more, but at a fraction of the price. See the comparison chart to find out which tool is right for you.
